DETAILED ACTION

This action is in response to the remarks filed on April 19, 2011.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-4, 6-14, 16-24, and 26-30 are rejected under 35 U.S.C. 102(e) as being anticipated by Yun (7,584,120), as set forth in the previous Office Action.

Response to Arguments

Applicant's arguments filed April 19, 2011 have been fully considered but they are not persuasive. The Applicant argues that Yun does not disclose receiving a registration request with an identified category into which the service is to be registered or determining if the identified category should be used based on a canonical service description associated with the identified category. In response, Yun discloses that the author decides whether a particular type of good or service fits into an existing category or sub-category. If the product fits into an existing category, then it is added, and if not, then a new category is created (col.6, lines 11-60). Therefore, Yun discloses receiving a registration request with an identified category into which the service is to be registered.

Yun further discloses that the process can be used for an existing category or adding a new category (col.6, lines 11-67). If the category is not suitable, another category may be added. Therefore, Yun discloses determining if the identified category should be used based on a canonical service description associated with the identified category.

Conclusion

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
